Wolverine Pipe Line Update:

As on Monday June 13, the clean up work at the Geneva Twp farm field continues on the spill caused when a local farmer damaged our pipeline carrying diesel fuel. We are in the process removing all impacted soil. Once that is completed, we will be backfilling the area with new soil. We have not set a time on how long the clean up efforts will take.

The pipeline has been repaired, tested and has been back in operation for the past week.

Attached, please find a comparison photograph, showing the impacted area of the farm field directly after the spill and how it looked on Friday, one week after the incident.

If you have any questions, please don't hesitate to contact me.
